Brazilian E-Commerce Marketplace

STRATEGIC ACTION PLAN & DEPARTMENTAL KRA FRAMEWORK

Objective: Turnaround Order Growth & Review Scores

Core Directive: Stabilize review ratings, restore repeat purchase retention, and eliminate regional delivery friction.

1. PRIORITIZED WORK / ACTION PLAN

Rank & Focus	Strategic Recommendation	Impact vs. Effort Call (Reasoning)	Key Tracking KPIs
Rank 1 Seller SLA	Enforce strict 48-hour order dispatch SLA for sellers with automated tier penalties and reduced search visibility for chronic delays.	**High Impact / Low Effort:** Enforces seller accountability via algorithm rules without capital expense.	• Dispatch Time: **< 1.5 days** • On-Time Handover: ≥ **92%**
Rank 2 3PL Logistics	Partner with regional 3PL carriers in high-delay corridors (e.g., RJ, BA) to consolidate freight and reduce transit handoffs.	**High Impact / High Effort:** Requires regional contract negotiations & API sync, but directly solves transit bottlenecks.	• On-Time Rate: ≥ **97.0%** • Inter-State Days: **< 9.0d**
Rank 3 CRM Retention	Launch post-purchase automated CRM lifecycle workflows (bounce-back incentives & re-order reminders within 30 days).	**High Impact / Medium Effort:** Leverages transaction data to drive repeat GMV with minimal recurring overhead.	• 60-Day Repeat Rate: ≥ **8.5%** • CRM Offer Conv.: ≥ **10%**
Rank 4 Dynamic EDD	Deploy ML-based dynamic Estimated Delivery Date engine factoring real-time seller location and carrier historical speed.	**Medium Impact / Medium Effort:** Shields review scores from unrealistic delivery promises while logistics scales.	• EDD Variance: ≤ **±1 day** • Net Review Score: ≥ **4.4/5**

2. DEPARTMENT-WISE KEY RESULT AREA (KRA) FRAMEWORK

Department	Core Strategic Objective	Target KPI & Benchmark	Key Operational Action
Logistics & Supply Chain	Eliminate transit delays and reduce regional freight friction.	• On-Time Rate: **92.1%** → ≥ **97%** • Inter-State Transit: **15.1d** → **< 9d** • Freight Cost: **-10% to -12%**	Audit high-delay corridors; consolidate volume with regional 3PL partners on long-distance routes.
Seller Operations	Eliminate seller dispatch delays and elevate quality standards.	• Dispatch Time: **3.23d** → **< 1.5d** • Handover Compliance: ≥ **92%** • Active Seller CSAT: ≥ **4.2 / 5.0**	Institute 48-hr SLA; penalize/offboard sellers exceeding 15% late dispatch or <3.0 review ratings.
Product & Tech	Align delivery expectations and optimize catalog metadata.	• EDD Prediction Error: ≤ **±1 day** • Heavy Item Delays: **-35%** • Item Misdescription Tickets: **-25%**	Integrate dynamic ML delivery estimates; standardize item dimension verification at listing creation.
Marketing & Retention	Pivot single-purchase customers into a recurring ecosystem.	• Repeat Purchase Rate: **3.12%** → ≥ **8.5%** • Platform CSAT: **4.0** → ≥ **4.4/5.0** • LTV : CAC Ratio: **1:1.2** → **1:3.5**	Automate post-purchase CRM triggers (replenishment & cross-sell); issue proactive credits on late orders.

90-Day Implementation Timeline:

Month 1: Launch 48-hr Seller SLA & 3PL RFP

Month 2: Sync 3PL APIs & Roll out CRM Automation

Month 3: Deploy Dynamic EDD & Audit CSAT
